

# Welcome to your Growth dashboard.

Hi Terrance — you've been given a private, view-only window into the Doublewide creator network: every account's audience growth, tracked day by day, week by week, month by month. Here's how to get in.

## YOUR LOGIN

|                    |                              |
|--------------------|------------------------------|
| Go to              | <b>doublewide.ai/login</b>   |
| Username           | <b>tfarr@parameno.health</b> |
| Temporary password | <b>TEMP!234</b>              |

For your security you'll be asked to **set your own password** the first time you log in. **1-time setup**

## GETTING IN — 4 STEPS

1. Open **doublewide.ai/login** in any browser (phone or computer).
2. Enter your username and the temporary password above, and click **Log in**.
3. You'll be asked to **create a new password** — choose something only you know, and save it.
4. You'll land right on your **Growth dashboard**. That's it — bookmark the page.

## WHAT YOU'RE LOOKING AT

The top shows the **whole network's total audience** and how much it grew this week and this month. Below that, a table lists every creator/page with its follower count and the **change over 24 hours, 7 days, and 30 days**, plus a 30-day trend line. It refreshes **automatically every day** — nothing for you to click.

### One number, climbing

The whole network's audience, compounding daily.

### Real, tracked reach

Followers that become leads and revenue on the Core.

### On R0cketShip

Doublewide rides the R0cketShip platform engine.

**Note:** this is a **view-only** report — you can see everything, nothing can be changed or broken. If today shows sample numbers, that's a preview of the layout; the real account data fills in automatically once the pages finish connecting.
