R0cketShip Demand Engine

Success-fee-driven joint ventures — we build alongside your brand and win together.

Demand-engine building: a **success-fee-driven joint venture** leveraging our proprietary technology and team. We build alongside a brand — either from your **baseline** (we track and get paid on growth over baseline at a negotiated rate), or we build a **secondary brand we own and operate together**: you bring operational expertise, we bring scale expertise, and we win. This unlocks everything above, as needed.

\$32,500/mo

MONTHLY RETAINER

12–50%

SUCCESS FEE (PER DEAL)

How the retainer works: 60% funds the services and 40% goes to team/profit. Each quarter the numbers are run and the 40% is deducted from the success-fee payout — the **greater of the two is paid**. Success is typically measured on sales or lift over baseline, and deals often include **negotiated equity**.

NPI / NEWCO exclusivity: when there is an opportunity to sell the business to Dr. NPI, Jeff Cline will exclusively represent that sale on behalf of this relationship and will not take it elsewhere without going through it. Under this agreement, as an owner Jeff Cline will not compete — running only NPI marketing, development, and demand-engine programs, with their revenue flowing through NEWCO.
