An Architectural Estate

A PRIVATE INVESTMENT OPPORTUNITY

CENTRAL VALLEY, CALIFORNIA | 20 ACRES | ARCHITECTURAL ESTATE

CONFIDENTIAL

THIS DOCUMENT IS CONFIDENTIAL AND INTENDED SOLELY FOR THE USE OF THE INDIVIDUAL OR ENTITY TO WHOM IT IS ADDRESSED. THIS MEMORANDUM DOES NOT CONSTITUTE AN OFFER TO SELL OR A SOLICITATION OF AN OFFER TO BUY ANY SECURITY. DISTRIBUTION OF THIS DOCUMENT IS STRICTLY PROHIBITED WITHOUT PRIOR WRITTEN CONSENT.

EXECUTIVE SUMMARY

Investment Overview

The Marley represents a rare opportunity to participate in the completion financing of a singular architectural estate in California's Central Valley -- a 20-acre property that reimagines luxury living through the fusion of industrial materiality and modern glass architecture.

LOAN REQUESTED

$5.5M

Construction completion

BORROWER EQUITY

$4.5M

Cash invested to date

FINISHED VALUE

$8.5M+

Conservative ARV

INVESTMENT TERMS

- 12-month construction completion loan
- 4-5 milestone-based construction draws
- 64.7% loan-to-value on finished appraisal
- Competitive interest rate (8-10%) plus origination points (1-2 pts)
- First-position lien on 20-acre estate

EXIT STRATEGY

- Primary: Conventional refinance at completion and stabilization
- Target 65-70% LTV conventional mortgage on $8.5M value
- Secondary: Market sale at $8.5M+ valuation
- Tertiary: Luxury retreat operation generating $400K-$800K annually

KEY TAKEAWAY

The borrower has already deployed $4.5M in cash equity -- representing 45% of total project cost -- demonstrating extraordinary financial commitment. The requested $5.5M construction loan is secured by a

first-position lien on a property with a conservative after-repair value of $8.5M, yielding a loan-to-value ratio of 64.7%. This transaction structure provides lenders with a 35.3% equity cushion against downside risk.

THE VISION

Where Industrial Meets Ethereal

The Marley is not a container home. It is an architectural estate of significant scale and ambition that employs repurposed shipping containers as a structural medium -- fused with expansive glass elements to create a residence that exists at the intersection of industrial authenticity and ethereal transparency.

The Design Philosophy

Conceived as a counterpoint to the manufactured uniformity of conventional luxury construction, The Marley draws inspiration from the raw materiality of Tadao Ando's concrete forms, the structural daring of Rem Koolhaas, and the glass-forward transparency of Philip Johnson's domestic work. The result is an estate that commands attention not through excess, but through an uncompromising commitment to architectural integrity.

Shipping containers -- the ubiquitous vessels of global commerce -- are transformed here into structural modules of remarkable strength and precision. Their corrugated steel surfaces, left deliberately visible in key areas, provide a visual counterweight to walls of floor-to-ceiling glass that dissolve the boundary between interior space and the surrounding 20-acre landscape.

ARCHITECTURAL DISTINCTION

- Multi-container configuration creating 6,000+ SF of living space across interconnected pavilions
- Cantilevered container elements extending over natural terrain features, creating dramatic visual moments
- Triple-pane, low-E glass curtain walls providing panoramic views while maintaining thermal efficiency
- Steel-and-glass bridges connecting residential, entertainment, and guest pavilions

SUSTAINABILITY CREDENTIALS

- Repurposed 16 decommissioned shipping containers, diverting 64,000 lbs of steel from waste stream
- Embodied carbon reduction of approximately 40% versus conventional steel-frame construction
- LEED-certifiable design incorporating passive solar orientation, natural ventilation corridors, and rainwater harvesting
- Solar-ready roof infrastructure across container surfaces (4,800 SF of potential panel area)

- Integration of container geometry with landscape architecture for indoor-outdoor fluidity
- Gray water reclamation system serving landscape irrigation across all 20 acres

MARKET CONTEXT

According to Architectural Digest and Dwell Magazine market analyses, architecturally significant residential properties command a 20-40% valuation premium over conventional construction of comparable scale. The Marley's design-forward approach positions it within a rarefied segment of the California luxury market where scarcity, not square footage, drives value.

THE PROPERTY

20 Acres of California Landscape

Situated on 20 acres of privately held land in California's Central Valley, The Marley occupies a position of exceptional natural advantage -- combining the agricultural richness of the valley floor with elevated terrain that provides unobstructed views of the surrounding mountain ranges.

SITE CHARACTERISTICS

- 20 acres of fee-simple ownership with no HOA restrictions, easements, or encumbrances
- Mixed terrain: gently rolling grasslands transitioning to elevated building sites with panoramic valley views
- Mature oak groves providing natural windbreaks and visual screening from adjacent parcels
- Year-round water access via private well (150+ GPM capacity) and seasonal creek
- Paved county road frontage with direct access; no shared driveways
- Less than 15 minutes to regional airport; 90 minutes to both San Francisco and Los Angeles metro areas via air

PRIVACY & SECURITY

- Minimum 500-foot setback from nearest property boundary to primary structures
- Natural topographical screening from surrounding parcels
- Gated entry with 1,200-foot private drive
- Perimeter fencing on all boundaries
- Zoning permits residential, agricultural, and special-use event applications

Construction Status

PHASE 1 -- COMPLETE ($4.5M INVESTED)

Site preparation including grading, drainage engineering, and soil stabilization across the 3-acre building envelope. Foundation systems poured and cured for all primary structures. Utility infrastructure installed: electrical service (400A residential), water main, septic system engineered for full buildout capacity, and telecommunications conduit. Container structural modules delivered, positioned, welded, and sealed. Structural steel framework for glass curtain wall systems fabricated and partially erected. Access road paved, perimeter improvements complete.

PHASE 2 -- REQUESTED ($5.5M BUDGET)

Completion of glass curtain wall installation across all pavilions. Full mechanical, electrical, and plumbing (MEP) buildout. Interior finishes: polished concrete floors, custom millwork, premium fixtures and appliances. Steel-and-glass bridge connectors between pavilions. Landscape architecture: hardscape, native plantings, outdoor entertainment areas, pool and terrace. Smart home integration, security systems, solar installation. Final inspections and certificate of occupancy.

INVESTMENT STRUCTURE

Capital Stack & Terms

The capital structure of The Marley project reflects a conservative, borrower-committed approach to construction financing. With $4.5M of cash equity already deployed, the requested $5.5M construction completion loan sits in a well-protected position within the capital stack.

TOTAL PROJECT COST
$10M
Land + Construction

EQUITY POSITION
45%
$4.5M cash invested

LOAN-TO-VALUE
64.7%
On $8.5M finished value

COMPONENT	AMOUNT	% OF TOTAL	NOTES
Borrower Cash Equity	**$4,500,000**	45.0%	Already deployed (Phase 1 complete)
Construction Loan (Requested)	**$5,500,000**	55.0%	Phase 2 completion financing
Total Capitalization	**$10,000,000**	100.0%	Full project cost

Proposed Loan Terms

PARAMETER	TERMS
Loan Amount	$5,500,000
Loan Type	Construction completion, interest-only
Term	12 months with optional 6-month extension

PARAMETER	TERMS
Interest Rate	8.0% - 10.0% per annum
Origination Fee	1.0 - 2.0 points ($55,000 - $110,000)
Disbursement	4-5 milestone-based construction draws
Security	First-position deed of trust on 20-acre estate
Guarantee	Full personal recourse guarantee
Exit	Conventional refinance or sale at completion

CONSTRUCTION TIMELINE

12-Month Completion Schedule

The construction completion program is organized into four sequential phases, each tied to a specific draw disbursement. All draws are subject to third-party inspection verification confirming milestone achievement prior to fund release.

MONTHS 1 - 3

Foundation Completion & Structural Systems

Completion of remaining foundation pours for secondary structures and bridge connector footings. Final structural steel erection for glass curtain wall framing systems. Utility connections finalized: permanent electrical service activation, water system pressure testing, septic system commissioning. Structural engineering sign-off on all container modules and steel framework. Third-party inspection and certification.

DRAW 1: $1,375,000 (25%)

MONTHS 4 - 6

Building Envelope & Glass Installation

Installation of triple-pane, low-E glass curtain wall systems across all pavilion structures. Container envelope weatherproofing: insulation, vapor barriers, exterior cladding where specified. Roofing systems installed including standing-seam metal and green roof sections. Steel-and-glass bridge connectors between pavilions erected and sealed. Building envelope achieves weather-tight status. Third-party inspection and certification.

DRAW 2: $1,650,000 (30%)

MONTHS 7 - 9

Interior Buildout & MEP Systems

Complete mechanical, electrical, and plumbing rough-in and finish. HVAC system installation (zoned climate control across all pavilions). Interior partition walls, polished concrete floor finishing, custom millwork fabrication and installation. Kitchen and bathroom fixture installation (premium specification). Smart home infrastructure: lighting control, audio/visual distribution, security system wiring. Third-party inspection and certification.

DRAW 3: $1,375,000 (25%)

MONTHS
10 - 12

Finishes, Landscaping & Certificate of Occupancy

Final interior finishes: paint, hardware, appliance installation, final fixture trim. Landscape architecture execution: hardscape (patios, pathways, retaining walls), native drought-resistant plantings, outdoor entertainment areas, pool and terrace construction. Solar panel installation and grid interconnection. Final mechanical and safety inspections. Certificate of Occupancy issuance. Punch list completion and project close-out.

DRAW 4: $1,100,000 (20%)

LENDER PROTECTION

All construction draws are subject to independent third-party inspection and milestone verification prior to disbursement. The draw schedule is structured to ensure that the value of work completed at each stage exceeds the cumulative loan amount disbursed, maintaining the lender's collateral position throughout the construction period. A 10% holdback on each draw is released upon project completion and CO issuance.

The Cost Approach

The cost approach to valuation is particularly instructive for The Marley, as it demonstrates that the projected after-repair value of $8.5M is materially below the replacement cost of the property -- providing a conservative baseline that underscores the margin of safety for construction lenders.

Replacement Cost Analysis

The cost approach estimates value by calculating the current cost to reproduce or replace the subject property, less any applicable depreciation. For new construction, depreciation is zero -- making this approach a direct measure of the capital required to recreate the asset from the ground up.

COMPONENT	ESTIMATED VALUE	BASIS
Land Value (20 Acres)	**$300,000 - $500,000**	Central Valley comparable acreage sales; agricultural/residential zoned parcels of 15-25 acres
Phase 1 Construction (Complete)	**$4,500,000**	Verified expenditures: site preparation, foundations, utility infrastructure, container modules, structural steel
Phase 2 Construction (Budgeted)	**$5,500,000**	Detailed contractor estimates: envelope, MEP, interiors, landscaping, solar, smart home systems
Soft Costs (Architecture, Engineering, Permits)	**$400,000 - $600,000**	Included in Phase 1 expenditures; additional permitting in Phase 2 budget
Less: Depreciation	$0	New construction; zero functional or physical depreciation
Total Replacement Cost	**$10,200,000 - $11,100,000**	Sum of all components

REPLACEMENT COST

$10M+

Total cost to reproduce

PROJECTED ARV

$8.5M

Conservative finished value

DISCOUNT TO COST

15-23%

ARV below replacement cost

CRITICAL INSIGHT

The projected after-repair value of $8.5M represents a 15-23% discount to the total replacement cost of the property. This means a prospective buyer could not replicate The Marley for less than $10M -- yet the property is being valued at $8.5M. This inherent conservatism provides substantial downside protection for construction lenders and validates the $5.5M loan request at a 64.7% loan-to-value ratio.

VALUATION ANALYSIS

Comparable Sales Approach

While no identical comparables exist for The Marley's unique architectural typology, a carefully curated selection of luxury estate transactions across California's premium markets demonstrates that $8.5M represents a conservative valuation for a property of this caliber, acreage, and architectural distinction.

> The comparable sales presented below are drawn from California luxury estate markets within 60-120 minutes of the subject property that share the same buyer demographic profile: high-net-worth individuals seeking architectural distinction, privacy, and acreage. Adjustments are applied for location, lot size, construction type, and age.

LOCATION	ACREAGE	DESCRIPTION	SALE PRICE	YEAR	$/ACRE
Paso Robles	15 acres	Contemporary architectural estate, steel + glass, vineyard views	**$6,200,000**	2025	$413K
San Luis Obispo	10 acres	Modern estate, concrete + glass, custom design by noted architect	**$5,800,000**	2025	$580K
Napa Valley	8 acres	Glass and steel residence, 5,200 SF, panoramic vineyard views	**$9,500,000**	2024	$1.19M
Santa Ynez	25 acres	Luxury ranch compound, 7,800 SF main + 2 guest structures	**$7,100,000**	2025	$284K
Carmel Valley	12 acres	Custom modern estate, award-winning architecture, 6,400 SF	**$11,200,000**	2025	$933K
Lake Tahoe	5 acres	Architectural home, floor-to-ceiling glass, mountain views	**$8,900,000**	2024	$1.78M
Sonoma County	18 acres	Modern farmhouse compound, sustainable design, 5,800 SF	**$7,400,000**	2025	$411K

LOCATION	ACREAGE	DESCRIPTION	SALE PRICE	YEAR	$/ACRE
Ojai Valley	8 acres	Modernist estate, steel frame + glass, mountain backdrop	**$6,800,000**	2025	$850K

ADJUSTMENT ANALYSIS

Location: Central Valley commands a discount relative to coastal markets (Napa, Carmel, Lake Tahoe), but The Marley's 20-acre footprint and architectural uniqueness offset this differential. Applying a 15-25% location discount to the comparable set yields an adjusted range of $5.2M-$9.4M.

Acreage: At 20 acres, The Marley is larger than most comparables. Adjusted per-acre values applied to 20 acres support a range of $5.7M-$9.2M.

Architectural Premium: The Marley's container-and-glass construction is more architecturally distinctive than any comparable in the set, supporting a 10-20% uniqueness premium.

Conclusion: The adjusted comparable range of $5.2M-$11.2M, with a central tendency of $7.5M-$9.5M, supports the $8.5M ARV as a conservative, well-supported valuation.

VALUATION ANALYSIS

The Income Approach

While The Marley is principally designed as a private residence, its architectural distinction and 20-acre setting create exceptional income-generating potential as a luxury retreat, corporate venue, and film/photography location. The income approach provides a third independent valuation methodology that further corroborates the $8.5M finished value.

Revenue Stream Analysis

REVENUE SOURCE	RATE	EST. ANNUAL UTILIZATION	ANNUAL REVENUE
Luxury Retreat Rental	$2,500 - $5,000 / night	80-120 nights	**$200,000 - $600,000**
Corporate Retreat Venue	$15,000 - $25,000 / event	8-12 events	**$120,000 - $300,000**
Film / Photo Location	$5,000 - $15,000 / day	15-30 days	**$75,000 - $450,000**
Private Events (Weddings, Galas)	$10,000 - $20,000 / event	6-10 events	**$60,000 - $200,000**
Estimated Gross Revenue			**$455,000 - $1,550,000**

CONSERVATIVE SCENARIO

NET OPERATING INCOME

Gross Revenue: $455,000

Less Operating Expenses (40%): ($182,000)

MODERATE SCENARIO

NET OPERATING INCOME

Gross Revenue: $800,000

Less Operating Expenses (40%): ($320,000)

Net Operating Income: $273,000

At 6% Cap Rate: **$4,550,000**

At 4% Cap Rate: **$6,825,000**

Net Operating Income: $480,000

At 6% Cap Rate: **$8,000,000**

At 4% Cap Rate: **$12,000,000**

INCOME APPROACH CONCLUSION

Even under the most conservative assumptions -- limited utilization, modest nightly rates, and a standard capitalization rate -- the income approach yields a valuation range of $4.5M to $12M+. The moderate scenario, which reflects realistic market demand for luxury architectural venues in California, supports a valuation of $8M-$12M. The $8.5M ARV falls squarely within the supported range, further validating its conservatism.

RISK MITIGATION

Lender Protections & Safeguards

The investment structure of The Marley has been deliberately engineered to provide multiple layers of downside protection for the construction lender. From substantial borrower equity to milestone-based disbursements, each element of the transaction is designed to align incentives and minimize risk exposure.

01

SUBSTANTIAL EQUITY CUSHION

At 64.7% LTV, the lender's position is protected by a 35.3% equity cushion. The property would need to lose more than one-third of its finished value before the loan balance exceeded the collateral value. This margin exceeds the typical 25-30% cushion required by institutional construction lenders.

02

DEMONSTRATED BORROWER COMMITMENT

The borrower has deployed $4.5M in personal cash equity -- not leveraged equity, not deferred compensation, but verified cash expenditures. This level of financial commitment eliminates the moral hazard present in highly leveraged construction deals and ensures the borrower's interests are deeply aligned with the lender's.

03

MILESTONE-BASED DRAW STRUCTURE

Loan proceeds are disbursed across 4-5 construction draws, each contingent upon third-party inspection verification of milestone completion. This structure ensures that the lender's disbursed capital never exceeds the value of completed work, maintaining collateral coverage throughout the construction period.

04

REDUCED CONSTRUCTION RISK

Phase 1 -- the highest-risk phase of any construction project (site work, foundations, structural systems) -- is already complete. The remaining Phase 2 work consists primarily of finishing trades (glass, MEP, interiors, landscaping) which carry significantly lower execution risk and more predictable cost profiles.

05

06

CLEAR EXIT STRATEGY

The primary exit -- conventional refinance at completion -- is well-supported by three independent valuation methodologies. The secondary exit (market sale) and tertiary exit (income operation) provide fallback positions. The 12-month term aligns precisely with the construction timeline, minimizing holding period risk.

PERSONAL RECOURSE GUARANTEE

The borrower provides a full personal recourse guarantee, backed by a strong personal financial statement reflecting technology industry success, multiple operating companies, and a proven track record of wealth creation across four successful exits. The guarantee provides an additional recovery mechanism beyond the real property collateral.

STRESS TEST

Even in a severe downside scenario where the finished property value declines 25% from the projected $8.5M ARV to $6.375M, the loan-to-value ratio would increase to 86.3% -- still within the range where the lender could recover principal through a distressed sale. The $4.5M in borrower equity provides meaningful first-loss absorption before any lender impairment occurs.

TARGET LENDER PROFILE

Ideal Capital Partners

The Marley's construction completion financing is ideally suited for sophisticated capital providers who understand the risk-adjusted return profile of secured real estate lending and who are comfortable underwriting architecturally distinctive properties on the basis of comprehensive valuation analysis rather than formulaic appraisal comparisons.

Ideal Lender Characteristics

FAMILY OFFICES

Single-family and multi-family offices seeking secured returns of 8-12% per annum with first-lien real estate collateral. The Marley offers a compelling alternative to corporate bond yields and public REIT distributions, with the added benefit of tangible collateral and a defined 12-month duration.

PRIVATE LENDING FUNDS

Construction-focused private lending funds with experience underwriting completion financing. Funds with California-specific expertise will recognize the value proposition of a 64.7% LTV loan on a luxury estate with multiple exit strategies and substantial borrower equity.

HIGH-NET-WORTH INDIVIDUALS

Accredited investors seeking direct real estate exposure with attractive current yield and principal protection. The personal, tangible nature of the collateral -- a one-of-a-kind architectural estate on 20 California acres -- appeals to investors who prefer visibility into their underlying assets.

Return Profile

ILLUSTRATIVE LENDER ECONOMICS

MARKET ANALYSIS

The Luxury Estate Opportunity

The California luxury real estate market continues to demonstrate resilience and growth, driven by structural demand factors including remote work migration, wealth creation in the technology sector, and a persistent undersupply of architecturally significant properties on meaningful acreage.

CENTRAL VALLEY YOY GROWTH

+4.3%

Median home price appreciation

ARCHITECTURAL PREMIUM

20-40%

Over conventional construction

LUXURY INVENTORY

2.1 Mo.

Supply at $5M+ price point

Demand Drivers

REMOTE WORK MIGRATION

The permanent shift to remote and hybrid work models has fundamentally altered residential demand patterns in California. High-net-worth technology executives and entrepreneurs -- previously tethered to coastal metros -- are actively seeking estate properties in less congested markets that offer acreage, privacy, and distinctive architecture. The Central Valley, with its relative affordability and accessibility to both Bay Area and Southern California airports, has emerged as a beneficiary of this migration.

SUPPLY SCARCITY

At the $5M+ price point, California's luxury inventory stands at approximately 2.1 months of supply -- well below the 6-month threshold that defines a balanced market. For architecturally significant properties on 10+ acres, the supply is

The Target Buyer

THE "HIGHLY MAINTAINED" PROFILE

The Marley's eventual buyer -- whether at a future sale event or as a justification for current valuation -- fits a specific psychographic profile that is growing within the California luxury market:

- **Lifestyle-driven:** Prioritizes experiential quality of life over proximity to urban centers
- **Design-conscious:** Values architectural integrity and material authenticity; reads Dwell, not Zillow
- **Authenticity over ostentation:** Prefers a 6,000 SF architectural statement to a 15,000 SF Mediterranean reproduction
- **Sustainability-aware:** Repurposed materials and LEED-certifiable design align with values

even more constrained. The Marley would enter a market segment where demand materially exceeds supply, supporting premium pricing and accelerated absorption.

- **Privacy-seeking:** The 20-acre footprint and natural screening are primary, not incidental, features

MARKET VALIDATION

Properties matching this profile in comparable California markets have averaged less than 90 days on market over the past 24 months, with multiple-offer scenarios common for truly distinctive estates.

BORROWER PROFILE

Jeff Cline

The Marley is developed by Jeff Cline, a technology executive and serial entrepreneur with over 30 years of experience building, scaling, and exiting technology companies. His financial commitment of $4.5M in personal cash equity to this project reflects both his conviction in the property's value and his capacity to see complex, capital-intensive projects through to completion.

Professional Background

TECHNOLOGY EXECUTIVE

Three decades of leadership in the technology sector, spanning enterprise software, artificial intelligence, digital platforms, and SaaS. Demonstrated ability to identify market opportunities, assemble teams, deploy capital, and execute against complex technical and operational objectives.

SERIAL ENTREPRENEUR

Four successful exits across multiple technology ventures, generating significant personal wealth and establishing a track record of value creation that spans market cycles. Each exit demonstrated the ability to build enterprise value methodically and realize that value through strategic transactions.

CURRENT OPERATING PORTFOLIO

Mr. Cline currently operates multiple technology platforms simultaneously, demonstrating the management bandwidth, financial sophistication, and operational discipline required to oversee a project of The Marley's scope and complexity:

- **agents.biz** -- AI agent marketplace and platform

Financial Qualification

EQUITY COMMITMENT

$4.5M in verified cash equity deployed to The Marley project to date. This is not theoretical equity, deferred compensation, or leveraged capital -- it represents direct cash expenditures on land acquisition, architectural and engineering services, permitting, site preparation, foundation systems, container procurement, structural steel, and utility infrastructure.

KEY FINANCIAL INDICATORS

- Strong personal financial statement available upon request under NDA
- Multiple income streams across operating companies provide debt service capacity
- No existing liens, judgments, or adverse credit events
- Established banking relationships with major

- **multifamilyoffice.ai** -- AI-powered family office solutions
- **softcircle.ai** -- Enterprise AI applications
- **jeff-cline.com** -- Personal brand and advisory platform
- Six additional operating platforms across technology and professional services

financial institutions

- Full personal recourse guarantee offered

TRACK RECORD OF EXECUTION

Mr. Cline's professional history demonstrates a consistent pattern of undertaking complex, multi-million-dollar initiatives and executing them to successful completion. The skills that produced four technology exits -- project management discipline, financial acumen, team leadership, and relentless execution focus -- are directly applicable to the completion of The Marley estate.

EXIT STRATEGY

Repayment Pathways

The construction completion loan is structured with a definitive 12-month term supported by three independent exit strategies. The primary exit -- conventional refinance -- is well-supported by the property's finished value and the borrower's financial profile. Two secondary exits provide additional repayment certainty.

Primary Exit: Conventional Refinance

Upon completion of construction and issuance of a Certificate of Occupancy, the borrower intends to refinance the construction loan into a conventional permanent mortgage. This is the most common and well-established exit path for construction completion financing.

REFINANCE PARAMETER	CONSERVATIVE	BASE CASE
Appraised Value	$8,000,000	**$8,500,000**
Target LTV	65%	70%
Available Proceeds	$5,200,000	**$5,950,000**
Construction Loan Payoff	$5,500,000	$5,500,000
Coverage Ratio	0.95x	**1.08x**
Estimated Rate	6.5% - 7.0%	6.0% - 6.5%
Estimated Term	30-year fixed or 7/1 ARM	

REFINANCE FEASIBILITY NOTE

In the conservative scenario, refinance proceeds of $5.2M fall marginally short of the $5.5M construction loan balance. In this case, the borrower would contribute the approximately $300K shortfall from personal funds --

a modest amount relative to the $4.5M already invested. In the base case, refinance proceeds exceed the loan balance, providing full repayment with excess proceeds returned to the borrower.

Secondary Exit: Market Sale

If market conditions favor a sale rather than a refinance, The Marley can be marketed to qualified buyers at the $8.5M+ asking price. Based on comparable sales analysis and current luxury market dynamics (2.1 months of inventory at $5M+), a market sale within 6-12 months of completion is achievable. Net sale proceeds after transaction costs (5-6% commissions plus closing costs) would yield approximately $7.9M-$8.0M -- more than sufficient to repay the $5.5M construction loan and return the borrower's equity.

Tertiary Exit: Income Operation

As demonstrated in the income approach valuation, The Marley is capable of generating $400K-$800K in annual gross revenue as a luxury retreat, event venue, and film location. This revenue stream provides a viable holding strategy if either the refinance or sale exit is delayed, ensuring the borrower can service the construction loan interest while awaiting optimal exit timing. The income operation requires no additional capital investment beyond the completed construction.
